

West Jordan High Career Pathways At A Glance

Miss Davis, Coordinator

Seniors do you want to be recognized at graduation and receive a beautiful colored Pathway cord and the opportunity to earn an enhanced diploma?

The pathway program at West Jordan High is designed to give students extended experience in their chosen areas of focus. This experience comes through elective class selection and a senior project. Projects are designed by the student and should be a minimum of 20 hours. Most of these projects focus on further experience in the school or community, either in skill building or service learning. Students may complete more than one pathway.

- Successful completion of a pathway results in wearing a colored cord at graduation
- Successful completion of a pathway along with completing two additional courses in your area of focus will entitle you to an enhanced diploma.

See our West Jordan High School website for more information and required forms.
